

Sander van Rijsoort

Senior front-end/full-stack developer

[Go to my LinkedIn](#)

Over the past six years, I've worked with both large corporations and small startups mainly as a **front-end developer**. My expertise lies primarily in **JavaScript**, **TypeScript**, **React**, **Next.js**, but also worked on back-end with **Node.js** and **Java**. Current ideal development workflow is **Visual Studio Code**, **Claude Sonnet 4.5** and **ChatGPT**.

Work experience

Senior Front-end Developer Digital Agency Klein Media

October 2024 - May 2025
Freelance

I was hired for **building custom themes** from scratch in Shopify and WordPress for various clients of digital agency Klein Media. Below I listed the websites that I have build and are currently live in production:

- Hunter's Coffeeshop Amsterdam - **www.hunters-coffeeshop.com** - 20.000 unique vistors p/m (WordPress)
- De Bourgogne Express - **www.bourgogne-express.nl** - 7000 unique vistors p/m (Shopify)
- Martin Bou Advocats - **www.martinbou-advocats.com** - 1000 unique vistors p/m (WordPress)
- The Yellow Academy - **www.theyellowacademy.nl** - 750 unique visitors p/m (WordPress)
- Sodefi - **www.sodefi.nl** - 300 unique visitors p/m (WordPress)

 JavaScript PHP WordPress Shopify TailwindCSS

Senior Front-end Developer Collabhouse.com

April 2024 - July 2024
Freelance

Collabhouse is a **music streaming distribution startup** with more than 100K users that helps connecting music makers, content creators and fans through music promotion, sync licensing, distribution, and NFTs. For this short assignment, I was asked to help out with **launching the new registration flow** for Collabhouse:

- **Fixing bugs** in the React (Gatsby) front-end to make new registration flow functional for production
- Participating in **code reviews**, **sprint reviews** and **retrospective** with the development team

Live in production: **www.app.collabhouse.com/register**

 JavaScript TypeScript React Gatsby Styled components GraphQL

Senior Front-end Developer Bol.com

October 2023 - March 2024
Freelance

For the **largest Dutch e-commerce retailer**, I was part of team Pets to build the new Horse application. This important application is used daily by +100 employees of Bol to update prices, promotions, delivery times and availability of millions of products listed on the Bol.com webshop.

- Developed **fully functional front-end** for Horse application with React (Next.js, v14, app router), TypeScript and SCSS modules
- Convert Figma designs to **responsive pixel-perfect** screens using the internal Bol Puik UI component library
- Created **back-end for front-end** in Java (Kotlin) to fetch all relevant data from multiple services within Bol to serve the FE
- Participating in **code reviews**, **sprint reviews** and **retrospectives** with the development team

 JavaScript TypeScript React Next.js SCSS Java Kotlin

Senior Full-stack Developer narratives.tech

June 2023 - September 2023
Freelance

In this project I was working as a full-stack developer to **deliver the MVP**, but mostly focussed on the front-end of the project. Basically this **crypto analytics platform** is used for traders to spot the next x1000 memecoin based on multiple data points from the blockchain.

- Responsible for **developing the front-end** with TypeScript and React (Next.js, v13, app router)
- Using the **TradeView charts** to show the user crypto charts
- Refactored some code on the back-end with Node.js
- Convert Figma designs to **responsive pixel-perfect** screens using the HeroUI component library (formerly NextUI)

 JavaScript TypeScript React Next.js Node.js TailwindCSS

Senior Front-end/Full-stack Developer CZ

March 2022 - January 2023
Freelance

For the third biggest insurance company in the Netherlands, with more than 3.7 million policy holders, I was hired as a front-end developer to develop out the new “Vergoedingsservice” from scratch with React (Next.js) and TypeScript. In parallel of this project, I was also tasked to create the **component UI library** of CZ in Storybook. Consisting of the following tasks:

- Built a fully functional front-end for the new “Vergoedingsservice” of CZ, **used by thousands of users daily**
- Convert Figma designs to **responsive pixel-perfect screens** in React (Next.js), TypeScript and SCSS modules
- Developed a **backend for front-end (BFF)** in Node.js to fetch all the data from old Sitecore API to serve the new application
- Together with the Lead Front-end Developer, we build an **UI component library** from scratch with the use of Storybook
- Participating in **code reviews, sprint reviews** and **retrospective** with the development team
- Wrote extensive **unit tests** for UI components with Jest
- Ensured all UI components met accessibility best practices and achieved at least **WCAG AA (A11Y)** compliance

Senior Front-end Developer Odido (formerly T-Mobile Netherlands)

March 2022 - September 2022
Freelance

For one of the biggest telecom providers in the Netherlands, Odido (formerly T-Mobile), I was hired to build a **new UI component library** from scratch for the redesign of Ben.nl website, a daughter company of Odido.

- Developing **UI component library** consisting of buttons, form inputs, navigation, badges, hero's, dropdowns, selects, radio buttons etc.
- Convert Figma designs of components to **responsive pixel-perfect screens** in jQuery, PHP (Twig) and Bootstrap
- Participating in **code reviews, sprint reviews** and **retrospective** with the development team
- Ensured all UI components met accessibility best practices and achieved at least **WCAG AA (A11Y)** compliance

Senior Front-end Developer Wunderman Thompson Commerce

October 2021 - March 2022
Freelance

Ted Baker

As a contractor for Wunderman Thompson Commerce since October 25, 2021, I have been primarily tasked with working on the Ted Baker account. Ted Baker is a renowned luxury retail brand based in the United Kingdom. They brought me on board to work on the checkout flow for their new website. The technology stack for this project includes Next.js (React), Redux, SCSS, and comprehensive unit testing with Jest and Enzyme. This checkout system is utilized by 1.5 million users globally on an annual basis.

DFS

Following my work on the Ted Baker project, I was tasked with the development of a new webshop for DFS - a renowned furniture brand with over 200 locations in the UK, the Netherlands, and Spain. The technology employed for this webshop includes Next.js (React), Redux Thunk, and Material UI. Backend with Java. To ensure its functionality, I utilized React Testing Library and Jest for testing purposes. My responsibilities primarily included fixing bugs and ensuring seamless compatibility across a range of browsers and devices.

Senior Front-end Developer Bitfactory

December 2021 - January 2022
Freelance

Digital agency Bitfactory from Rotterdam has asked me to work on one of their projects, called NRV.T. It stands for "Nederlands Register Vastgoed Taxateurs". The organisation was founded to manage all taxers of property within the Netherlands. The CRM they are using to manage their relations, is being build by Bitfactory and was needed to finish their front-end. The front-end I worked on is using TypeScript, Nuxt (Vue.js), Vuex and PostCSS for styling.

Senior Front-end Developer Growzye

April 2021 - November 2021
Freelance

Growzye is an early startup for inventory management app for your bar or pub that handles everything from ordering and invoice reconciliation to stock and waste management. I was responsible for building some of the features that Growzye has to offer to it's clients.

Front-end developer

Luggo

February 2021 - April 2021
Permanent

At Luggage Care, I have been responsible for the front-end of the goluggo.com platform. GoLuggo is part of Luggage Care and is a permanent startup, which tries to eliminate the pain of carrying around luggage when you are travelling. Your luggage is being checked in at your door and will be delivered at your destination. Also I was responsible for some bug fixing for their React-Native application.

In the last few months, I have been working mostly on the goluggo.com platform. The most important feature of this platform, is the booking flow: customers can make a reservation here. The platform is built with React, Redux Saga, Styled Components and MaterialUI. Together with the development team of Luggage Care, we have been working according to the SCRUM methodology.

BSc Business Administration

Erasmus University Rotterdam (RSM)

January 2017 - September 2018

Bachelor Business Administration successfully completed with an average of a 6.8. This bachelor is aimed on every aspect of business. Bachelor thesis "Sharing a coke - Does it taste better together?" successfully finished with 7.

Recommendations

Koen van Rijswijk

Engineering manager at bol.com

Sander was with one of my teams at bol for 6 months. He was quick to onboard within the team and the tech stack and infrastructure we use. He does this by being pro-active, self reliant and easily connecting with his team.

He created impact by completely setting up a new FE for a service - which is used by 100+ internal users - well within the deadlines (finishing 2nd iteration), based on the designs of our designer and most important of all to the satisfaction of said users. Also not afraid to work on BE stuff - which shows his willingness to contribute.

I can truly recommend Sander if you need a really good FE-engineer with the right attitude - he is the first I will call when i've got another assignment for him.

Andrey Posudevsky

Freelance Full Stack Web Developer / Architect at T-Mobile Netherlands

Sander is a highly skilled and talented developer who delivers a good work. One of the key factors that made our collaboration a success was Sander's good communication skills. He was always prompt in responding to my emails and inquiries. This level of communication made it easy for us to work together and kept the project running smoothly.

In addition to Sander's good communication skills, he also showed a remarkable ability to work independently. He was able to complete tasks efficiently and effectively without the need for constant supervision. This not only saved time and resources, but it also allowed me to focus on other aspects of the project while knowing that Sander had everything under control.

Peter Bust

Freelance Senior Front-end Developer at CZ

Sander joined our team at the start of a project that had yet to be formed. He does not shy away from a challenge and has an open and calm working attitude. Focus on delivering business value without losing sight of quality. This attitude and his knowledge matched the needs of the team well. Therefore, our collaboration was very pleasant and I look forward to working with Sander more often in the future, if the opportunity arises.
